

New Correctional Facility for Women Construction Update November 10, 2016

We have completed construction week #32 of the new Correctional Facility for Women in Concord; we continue to be on schedule and within budget. The picture below is of one of the many unique pieces of equipment on site. This is a 197 foot, five-axle, 165 ton Grove crane. This crane can reach up to 312 feet with twin locks, a six section boom and can lift the equivalent of 5 fully loaded dumps trucks all at one time. It is powered by an 8 cylinder Mercedes turbo diesel engine, a 16 speed transmission and can travel at highway speeds. This particular machine is made in Germany and with attachments is over \$1.6 million new.

Jonathan. K. Hanson, Administrator of Logistics, 271-1888
